Purposeful Pergolas

For those few lucky enough to have gardens in Hong Kong, comes the new Practic self-supporting pergolas from Lift Lifestyle. Completely manufactured in Italy with a guarantee of quality and reliability, these elegant pieces of outdoor "furniture" combine both innovation and functionality. They come in a wide range of designs and can be customised regarding both colour and size.

Each unit has a unique drainage system hidden within its supports to protect the aesthetics of the structure. The roof and sides can be opened and closed by remote control or automatically set to respond to a wind and rain sensor.

These pergolas are designed to be completely eco-friendly and are built from recyclable and non-toxic materials, being made of 100 percent polyethylene. Only the very best raw materials are used, such as the Viro brand of synthetic rattan which not only offers great flexibility and tensile strength but is temperature resistant. liftlifestyle.com
